Sleep is a very important part of our lives. Unless we sleep enough hours every day, we cannot work or perform our regular duties. People are really different in terms of sleep. Some people are like camels – they can sleep very little for six days and then sleep for 24 hours on the last day. Others have to sleep for some hours each day of the week. Some people find that they only need five or six hours of sleep. Others need eight hours or even more. Women usually sleep a bit more than men.

Our need in sleep also changes with age. You see, children sleep more than adults. They also sleep during the day. Most doctors consider that eight hours a night is a norm. However, it is important to consider how much sleep you need on an individual basis.
